(54) RADIO COMMUNICATION CARD

(57)Abstract:

PURPOSE: To provide a PC card for radio communication which can perform a radio communication such as personal handy phone and radio LAN without providing an external module or extension part.

CONSTITUTION: At the base part of the PC card 21, an antenna storage part 22 is provided, and this antenna storage part 22 is fitted rotatably with a transmission and reception antenna 23 for radio communication which is fitted movably between a 1st position where it is stored in the antenna storage part 22 and a 2nd position where it is projecting from the card base body. Consequently, the transmission and reception antenna 23 for radio communication can be put in the card base body by being stored in the antenna storage part 22 when no radio communication is made, and can also be taken out of the card body by being drawn out of the antenna storage part 22 when a radio communication is made.
